FOR USED-CAR LOT OWNERS

Run the Whole Lot *From Your Phone*

The Dealer Suite is a CRM for independent used-car lots. Sales, the desk, finance, the shop and your numbers live in one app, and every person on your team gets the screens their job needs.

WHAT IT IS

One App, *a Screen for Each Job*

Your owner, sales manager, salespeople, finance manager, service advisor and technicians each sign in to their own view. Each role sees what it needs. Cost and gross stay hidden from the people who shouldn't see them, and an audit log records who changed what.

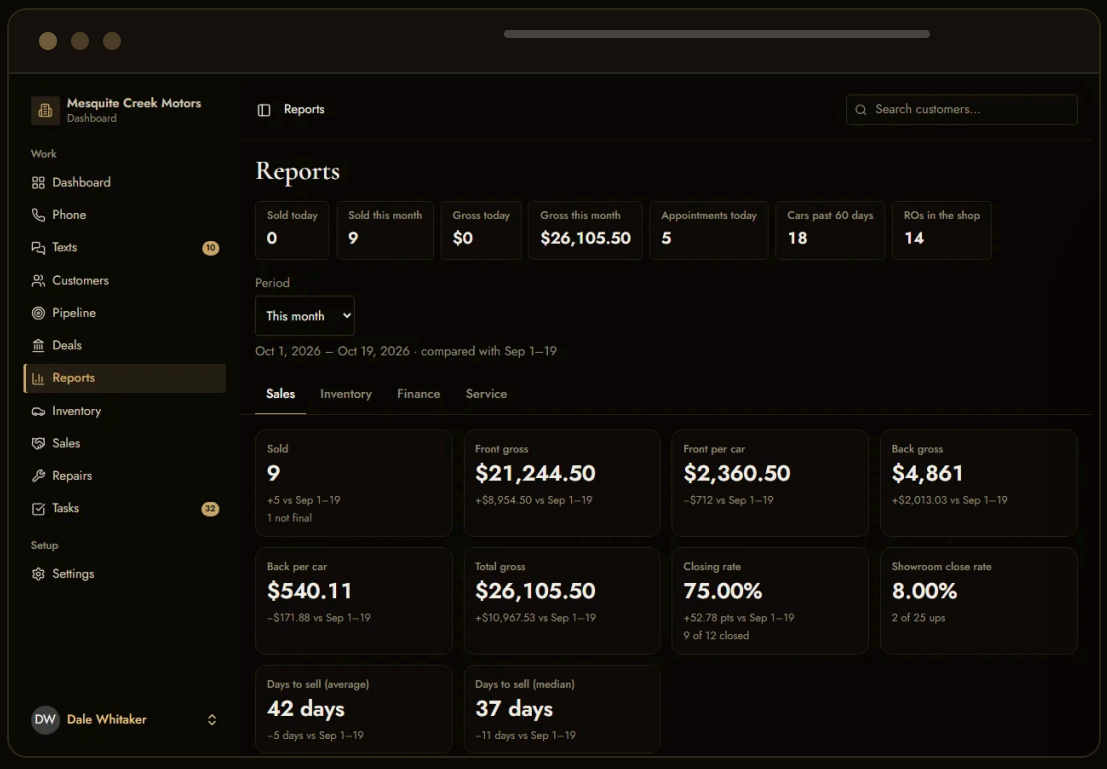

It works on a phone on the lot and on a desktop in the office. Below is one ordinary day for each part of the lot, with screens from our demo lot. Every name, car and number in them is made up.

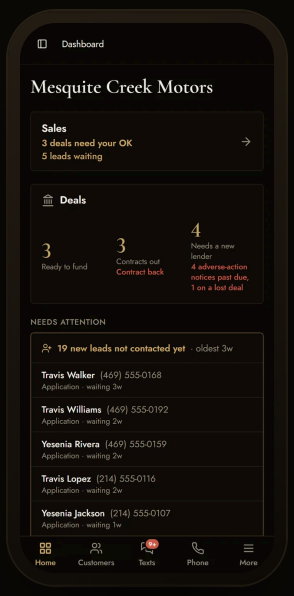

THE OWNER'S DAY

Know Where Things Stand *Before You Get In*

Open the app over coffee and Home shows what needs you: deals waiting on your OK, leads nobody has called yet, and deals ready to fund. At your desk, Reports has the month in front of you.

- A manager has to OK any deal discounted past the limit you set, sold below cost, or written on a car with no asking price.
- Inventory: scan the VIN and the free NHTSA lookup fills in the car. Stock numbers, up to 60 photos per car, days in stock, and the FTC Buyers Guide ready to print.
- Two-factor login and an append-only audit log.
- Reports has Sales, Inventory, Finance and Service tabs, compared with the period before. Every table downloads as a CSV.
- Your cars show on inventory pages for your website, and "Ask about this car" comes in as a lead.

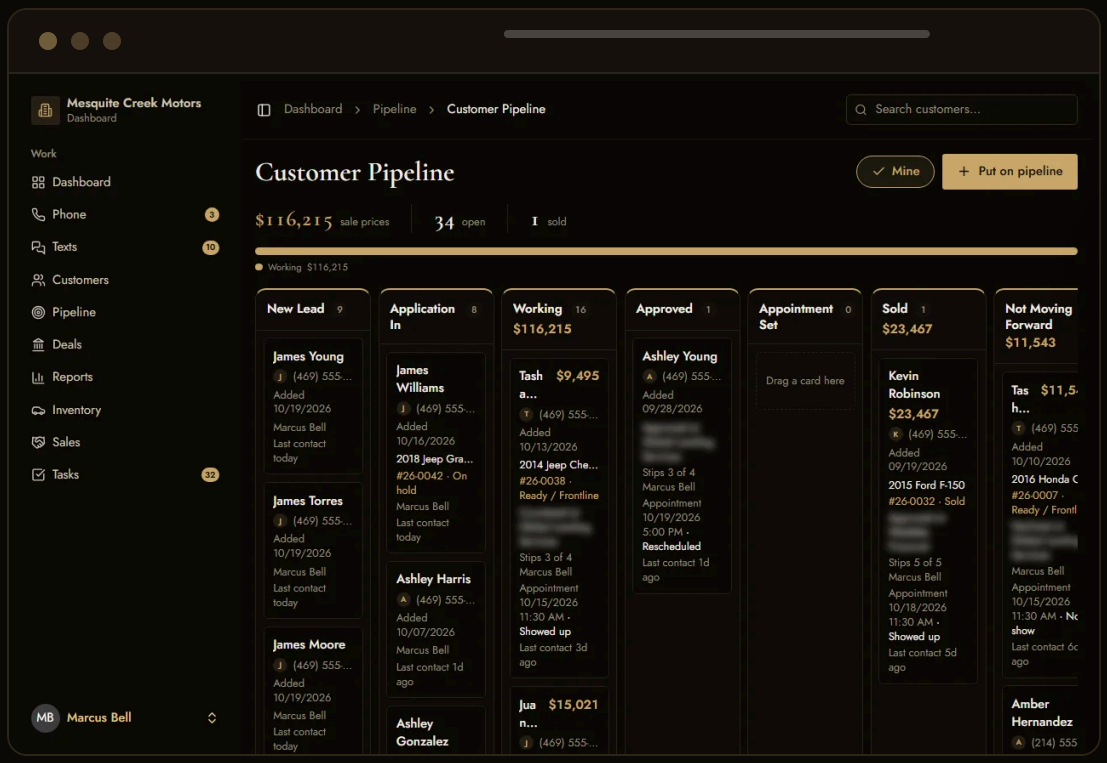

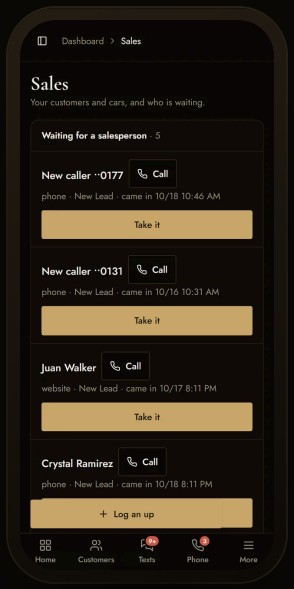

THE SALESPERSON'S DAY

Work the Lot With *a Phone in Your Hand*

The Sales tab shows a salesperson the leads waiting, their own customers and cars, and today's ups, right on the phone.

- Each customer and car belongs to a salesperson, and only a manager can reassign them.
- Web leads can go out by round-robin. The showroom log keeps every up.
- The desk works out tax, fees and a payment grid to the cent, with asking and selling price side by side.
- The pipeline board shows each deal card with the car, trade, down payment, lender status, stips, appointment and salesperson.
- Every car has an interest board, so the whole floor can see who wants it.
- A direct line for each salesperson: click to call, voicemail, and texts. Every call and text lands on the customer's timeline.
- Quotes go out by text, email or link. They're quotes only. A customer can't sign one.

Lender names in the demo screens are blurred.

THE FINANCE MANAGER'S DAY

Track Every Deal *Until the Money Is In*

The Deals page lists every financed deal by stage: working, needs a new lender, ready to fund, contract out, funded and paid. Finance starts the day there.

- Send a deal to several lenders and compare the answers side by side.
- An F&I product menu on the deal.
- A funding tracker follows the contract from sent to back to funded, then to money received.
- Stips are tracked on each deal, so you can see what's in and what's still needed.
- Paperwork is tracked as checks: who did each one, and when. The app doesn't generate legal documents.
- A Lenders page for the lenders you send deals to.

Lender names in the demo screens are blurred.

THE SERVICE AND SHOP DAY

The Shop on *One Board*

The service advisor writes repair orders for lot cars and for customers' cars and moves them across the shop board. Technicians keep their phone on the fender and work from their own list.

- Recon and customer-pay repair orders on a shop board: waiting, in progress, waiting on parts, quality check, done.
- Recon cost rolls into the car's cost, so nobody types it twice.
- A customer approves the estimate from a private link.
- Technicians see only their own jobs. They clock in and out on each one and add photos, and they never see prices or customer details.

TWO WAYS TO START

Basic or *Full Suite*

Basic is the CRM a lot runs its customers on. It suits a lot that keeps inventory and contracts somewhere else. Full Suite adds the rest of the lot: roles, inventory, sales, the desk, phones, the shop, finance and reports.

WHAT'S INCLUDED	BASIC	FULL SUITE
Customers, each with a timeline of everything that happened, and duplicate merge	✓	✓
A credit application on your website, with an encrypted SSN, a logged reveal and a printable application	✓	✓
A pipeline board with deal cards: car, trade, down payment, lender status, stips, appointment, salesperson	✓	✓
Tasks, Home and Settings	✓	✓
Two-factor login	Optional	✓
Dealer roles with their own permissions, an audit log, cost and gross hidden by role	No	✓
Inventory: VIN scan, stock numbers, photos, days in stock, Buyers Guide, inventory pages for your website	Can be turned on	✓
Sales tab: ownership, interest board, round-robin, showroom log	No	✓
The desk and quotes: tax, fees, payment grid, manager's OK, quotes by text, email or link	No	✓
Calling and texting: a lot line, a direct line per salesperson, voicemail, optional recording, consent and STOP handling	No	✓
Repairs: recon and customer-pay repair orders, shop board, technician clocks and photos, approvals by link	No	✓
Finance: several lenders per deal, F&I product menu, paperwork checks, funding tracker	No	✓
Reports: Sales, Inventory, Finance and Service, with CSV downloads	No	✓

On Basic, two-factor login is a setting you can turn on for each account. Inventory can be switched on for a Basic lot by itself.

WHAT IT DOESN'T DO

So nobody's surprised later: it doesn't send deals to lenders through a lender network, print contracts or e-sign them, service buy-here-pay-here loans, pull credit, or import your current data. A new lot's inventory and customers go in by hand. It doesn't do your accounting or title work either, and it doesn't look up book values or vehicle history. Your cars show on your own website and nowhere else. It doesn't list them on outside car marketplaces.

PRICE

Pricing on request

Tell us about your lot and we'll walk you through Basic and Full Suite.

TRY IT WITH YOUR OWN HANDS

See Your *Own Demo*

We'll set up a private copy of our demo lot just for you. It's full of made-up cars and customers, and you can look at it as every role on the team. Nothing in it sends a real text or places a real call, and it ends after 14 days.
