3rd Generation Paint and Body

Auto body shop · 1604 Duck Creek Rd, Sanger, TX 76266

3rd Generation Paint and Body has built one of the strongest Google reputations of any body shop in Sanger, a 5.0 rating across 25 reviews and the number one map pack spot in four of five searches this week, without a website. There is nowhere for that traffic to land: no website under any name we searched, no online booking link, and a services list that never names hail repair or custom paint, the two specialties named in this business's own description.

YOUR GOOGLE LISTING

A Google listing already winning, with a few thin spots

25 reviews at a 5.0 and the top map pack spot in four of five searches make this one of the stronger listings we have audited here. It is held back by a single category and a services list that never names hail repair or custom paint.

What moves this grade most: Naming hail repair and custom paint explicitly in the services list, and adding a second Google category.

YOUR WEBSITE

There is no website to grade

Google lists no website for this business, and none could be found under this name or any close variation. Every technical, on-page, and conversion check in this audit came back empty because there is no page to check.

What moves this grade most: A working website, first. Everything else in this document assumes there is a page for a customer to land on.

— WHAT IS ALREADY WORKING

- ✓ A 5.0 rating across 25 reviews and the number one map pack spot in four of five searches this week, the strongest reputation of any body shop we checked here, with no website behind it.

— THE THREE FIXES THAT MATTER MOST

1

Get a real website live

There is no website under this business's name.

2

Name the specialties where Google can match them

The Google services list only shows generic entries.

3

Capture the calls that come in when the shop is closed

There is no booking link on the Google listing.

Searched from Sanger, Sept 28. Your phone may show a slightly different order depending on where you're standing.

3rd Generation Paint and Body held the number one map pack spot in four of the five searches we ran this week. The exception was hail damage repair, where Sanger Hail Repair held the top spot and this business came in third. With no website, none of these searches had anything of this business's own to show in the regular organic results below the map pack.

— YOUR WEBSITE

There is no website to grade

F

Google lists no website for this business, and none could be found under this name or any close variation. Every technical, on-page, and conversion check in this audit came back empty because there is no page to check.

— WHAT NEEDS WORK

- ✗ **Page title.** There is no website, so there is no page title to read.
- ✗ **Structured data (schema).** No page loads anywhere, so there is no schema markup to check.
- ✗ **Sitemap & indexing.** With no domain on file, Google has nothing of this business's own to crawl or index outside the Google listing itself.
- ✗ **Broken pages.** There are no pages, broken or otherwise.
- ✗ **Mobile & HTTPS.** No HTTPS certificate and no mobile layout exist, because there is no live site.

What moves this grade most: A working website, first. Everything else in this document assumes there is a page for a customer to land on. The technical checks behind this grade are on page 8.

FIXES YOU CAN MAKE YOURSELF, FREE

7 fixes that cost nothing but time.

This list is yours to use however you want, with us or without us.

YOU CAN DO THESE YOURSELF

- ☐ **Add a second Google category beyond Auto body shop, such as Auto dent removal service or Car repair and maintenance service.**
Verified: the listing carries exactly one category.
- ☐ **List hail repair and custom paint as their own line items under the Google Business Profile's Products and services section.**
Verified: the current services list only shows generic entries, Body and Trim, Air conditioning, Battery, Electrical, Painting, Welding, and Collision repair.
- ☐ **Add more job photos to the Google listing, especially before and after shots of hail and custom paint work.**
Verified: 11 total photos are on the profile right now.
- ☐ **When a hail repair or custom paint customer leaves a review, ask them to mention the job by name.**
Verified: 25 reviews at 5.0 is the strongest reputation of any body shop we checked here, but none of it currently signals these two specialties by name.
- ☐ **Claim the free business profiles on Yelp, Carwise, Yellow Pages, Bizapedia, and Yahoo Local under this business's exact name and address.**
Verified: all five list this business already, with nothing on any of them indicating an owner has claimed or updated it.
- ☐ **Add a booking or request-a-quote link to the Google Business Profile.**
Verified: the profile's booking link field is empty.
- ☐ **Add the towns actually served, Sanger and nearby communities such as Krum, to the Google Business Profile description.**
Verified: the current description lists certifications and specialties but names no service area, even though a March post on the business's own Facebook page shows a completed job as far out as Krum, TX.

— YOUR GROWTH PLAN

The changes, in the order we would make them.

1 Get a real website live

Today: There is no website under this business's name. Google lists none, and none turned up under any close name variation we searched.

After: A customer who finds this business in the map pack, or already knows it does work as far out as Krum, TX, has somewhere to click before deciding.

2 Name the specialties where Google can match them

Today: The Google services list only shows generic entries. Hail repair and custom paint, the two specialties named in the business's own description, are not among them.

After: Both specialty searches start matching on the words themselves, not just proximity and rating.

3 Capture the calls that come in when the shop is closed

Today: There is no booking link on the Google listing. With no website either, the only way to reach this business is a phone call during posted hours.

After: An after-hours or weekend inquiry turns into a text conversation instead of nothing at all.

4 Get the other listings claimed and current

Today: Yelp, Carwise, Yellow Pages, Bizapedia, and Yahoo Local all list this business, with nothing on any of them indicating an owner has claimed or updated it.

After: The same accurate name, address, and hours everywhere a customer might look.

5 Turn the existing reputation into more of the same

Today: 25 reviews at 5.0 is strong, but none of it currently mentions hail repair or custom paint by name, and there is no system asking the next customer to leave one at all.

After: A review count that keeps growing on its own, increasingly naming the specialty work this business wants to be found for.

anytime

Month to month, no minimum, and you can cancel anytime. Essentials covers four of the five items above directly: a new five-page website built from scratch, since there is currently no site of any kind; ongoing Google Business Profile management, so category, service and description changes get made and kept current rather than done once and left; and automated review requests plus missed-call text-back, to start capturing the leads that currently go nowhere outside posted hours. Claiming and standardizing the other directory listings is the one item left on the free checklist earlier in this document, something this business can do without paying anybody.

- ✓ A new custom 5-page website, built and published
- ✓ Logo design, slogan and digital brand assets, or a refresh of the brand you already have
- ✓ Online booking and lead-capture forms
- ✓ Missed-call text-back
- ✓ Basic on-page SEO built into the site, so it can be found
- ✓ Google Business Profile optimization
- ✓ Automated review requests after every job

In your name from the first day, and yours if you ever leave: your website, domain, logo and brand assets, Google Business Profile, phone numbers, review profiles and customer list. We keep the software platform and the automations that run on it, the same as any software you subscribe to.

Automated texting runs in accordance with business texting regulations and carrier registration, which we handle as part of setup.

This is only the part we can see from the outside.
