

■ PREPARED FOR

Your Neighborhood Garage Door Repair

Website & Google Business Profile Audit · Garage door repair & installation

This is a free, no-obligation snapshot of how Your Neighborhood GDR shows up online today — your Google Business Profile, your customer reviews, and your website. Over the next couple of pages we walk through, in plain English, what's already working, what's quietly costing you customers, and the biggest opportunities to win more calls and bookings. No jargon, no pressure — just an honest look, prepared for you by Top Shelf.

BUSINESS	Your Neighborhood Garage Door Repair
CATEGORY	Garage door repair & installation
LOCATION	Denton, TX (serving the DFW Metroplex — 66+ cities)
PHONE	(940) 644-4376
WEBSITE	yourneighborhoodgdr.com
GOOGLERATING	No public Google rating found yet

■ WHERE YOU STAND TODAY

This is a genuinely well-built local business with a professional, content-rich website that already outclasses most garage-door competitors on the web. The biggest opportunity isn't the site — it's turning that strength into a visible Google Business Profile with reviews and Map Pack presence, which is where most local calls are actually won.

■ TOP SHELF SCORECARD

Our assessment of each part of your online presence, graded A–F and backed by the specific findings below.

DIMENSION	GRADE	ASSESSMENT
Google Profile	C	Nextdoor presence and a 2025 Neighborhood Fave award are confirmed, but a verified Google Business Profile with a public star rating and Map Pack ranking wasn't found in search — the biggest gap for a service business.
Reviews / Reputation	C+	Real social proof exists (Nextdoor faves, on-site testimonials, '5,000+ neighbors helped'), but there's no visible aggregate Google rating or review count, which is what most customers check before calling.
Website quality	A	Fast-feeling, mobile-friendly, professional design with prominent click-to-call, quote forms, deep service pages, city pages, and helpful how-to guides — genuinely strong.

Local / niche SEO	A ⁻	~180 pages of well-structured, uniquely localized city + service + guide content (real ZIP codes, neighborhoods, landmarks) — a serious topical-authority footprint that ranks in organic search.
Lead conversion	A ⁻	Phone number and 'Call Now' / 'Get a Free Estimate' CTAs are everywhere, 24/7 answering is promised, and the quote request path is clear — very little friction to becoming a lead.
OVERALL		B ⁺

■ GOOGLE BUSINESS PROFILE — FINDINGS

What's working

- Won the 2025 Nextdoor Neighborhood Fave award and has genuine neighbor recommendations on Nextdoor.
- Consistent name, phone, and website across their own pages and the directories where they appear.
- Clear service-area positioning across 66+ DFW cities with a strong local, neighbor-to-neighbor brand.

Gaps & opportunities

- No verifiable Google Business Profile with a public star rating and review count surfaced — this is the single highest-impact fix.
- For 'garage door repair Denton,' the Google Map Pack is dominated by competitors with physical Denton addresses; a service-area profile needs deliberate work to show up there.
- Review volume and recency aren't visible on Google, so the reputation that clearly exists offline isn't being captured where buyers look first.

■ WEBSITE — FINDINGS

What's working

- Clear, prominent phone number with click-to-call and multiple strong calls-to-action on every page.
- Deep, uniquely written local content — dedicated city pages (Denton page references real ZIP codes, universities, and neighborhoods) plus service and how-to guide pages.
- Professional, mobile-friendly design with trust signals (award badge, testimonials, licensed/insured, warranty messaging).

Gaps & opportunities

- No live Google reviews widget or aggregate rating pulled onto the site — visitors see claims but not a verifiable star rating.
- Structured data (LocalBusiness with aggregateRating, Service, FAQ schema) couldn't be independently confirmed and should be audited to ensure it's present and valid on key pages.
- Trust claims like '5,000+ neighbors helped' would convert harder if backed by a visible, clickable Google rating.

■ PRIORITY FIXES — HIGHEST IMPACT FIRST

- 1 Stand up and optimize the Google Business Profile — A verified, fully-filled Google Business Profile with the right primary category and service areas is where most 'garage door repair near me' calls come from — this is the biggest missing piece and the fastest path to more calls.
- 2 Build and showcase Google reviews — Systematically ask happy customers for Google reviews and embed the live rating on the site. The reputation clearly exists offline (Nextdoor Fave, 5,000+ helped) — it just needs to be visible where buyers decide.
- 3 Win the Denton / near-me Map Pack — Competitors with physical Denton addresses currently own the map results. Use the reviews, GBP service-area settings, and localized landing pages together to break into the top 3 map spots for high-intent terms.
- 4 Audit and complete on-page schema — Confirm valid LocalBusiness, Service, and FAQ structured data (with rating data once reviews exist) on the homepage and city/service pages so listings can earn rich results and stronger click-through.

Your tailored plan See the companion Top Shelf Opportunity document for what these fixes mean for Your Neighborhood GDR — and how we build it.
