TOP SHELF BUSINESS SOLUTIONS

PREPARED AUGUST 2026

■ PREPARED FOR

Cafe Smile Studio

Website Audit & Growth Plan · Dental practice

A free, no-obligation look at how Cafe Smile Studio shows up online today, and what we would do about it.

■ THE SHORT VERSION

A 5.0 from 256 reviews, and a website that no search we ran sends anybody to. On all three searches, cafesmilestudio.com was absent from the top ten, and the page your reviews point at is built at a fixed 1440 pixels with no way to tap the phone number.

■ WHAT IS ALREADY WORKING

- A 5.0 rating from 256 Google reviews. Nothing else in this report is worth as much as that, and it is the one thing nobody can build for you.
- The site has better bones than most we look at. The title is written properly at 51 characters, there is a real meta description at 158 characters, and the page ships valid Dentist structured data carrying your address, your coordinates and your opening hours.

DIMENSION	GRADE	ASSESSMENT
Google Business Profile  94	A	A 5.0 from 256 reviews with the website linked. This is the strongest thing the practice owns.
Website quality  57	F	A good title, a real description and valid schema, sitting inside a page fixed at 1440 pixels with 12 top-level headlines and no alt text.
Local search visibility  36	F	Absent from all three searches we ran, with no page about Highland Village anywhere on the site.
Turning visitors into customers  53	F	No tappable phone number, and 486,719 bytes of homepage for a phone to pull down first.
OVERALL  60	D ⁻	

Each row is the straight average of the graded checks in the sections covering it, and the overall is the average of the four rows. Every check and its number is printed in sections 03 through 06. Letters follow the ordinary school band, so 93 and above is an A, the eighties are Bs, the seventies Cs, the sixties Ds, and anything under 60 is an F. We did not soften it.

■ WHAT WE WOULD FIX, IN ORDER

- 1 Rebuild the site for the phone people actually search on
- 4 Fix the headings and write the alt text that matters

2	Make it possible to call you in one tap	5	Keep the reviews coming, and answer them
3	Give Google something to rank	6	Reach the patients you already have

01 is the free do-it-yourself list, 03 and 04 grade each piece, 05 works through the 6 fixes, 06 is who we are and what we charge.

01 Fixes You Can Make Yourself, Free

■ SIX THINGS YOU CAN FIX YOURSELF, WITHOUT PAYING ANYBODY

This audit is yours to use however you want, with us or without us. So here is the part that needs no developer and no money, only somebody with the Google login and access to the site. We put it first on purpose. Everything from here down is the diagnosis. This page is the part you can act on before you finish reading.

01 **Make the phone number tappable**

There are 0 tel: links on your homepage. The number is printed, but on a phone it is text rather than a button, so a patient has to memorize it or copy it across by hand. Whoever maintains the site turns each printed number into a link in about two minutes.

02 **Write alt text on the photographs that matter**

There are 86 images on the homepage and not one carries alt text, the short written description attached to an image that tells a search engine what it shows. Being straight with you, this is the only item on this page that is free but not quick. Do not try to write all 86. Do the photographs of the practice, the team and your own work, and leave the decorative ones alone.

03 **Cut the homepage down to one main headline**

The homepage carries 12 h1 tags. An h1 is meant to be the single main headline of a page, the one Google reads first to work out the subject. With 12 of them, none of them counts for much. Picking one and demoting the rest is about an hour in the page editor.

04 **Quote three of your Google reviews on the homepage**

You have 256 of them at a clean 5.0. Copying three onto the homepage with the reviewer's first name costs nothing and reads better than anything a copywriter would invent for you.

05 **Sign in to your Google profile and fill in whatever is blank**

We could not see the description, the services list or the photo library from outside, so we are telling you where to look, not telling you they are empty. Sign in, read each section, and fill anything that is not filled. It is free space to say in your own words what the practice is.

06 **Ask for a review at the front desk, every time**

256 reviews at 5.0 says the asking works whenever it happens. It is the cheapest thing on this list and it is the only one that keeps paying after you stop.

02 Business Snapshot

BUSINESS	Cafe Smile Studio
CATEGORY	Dental practice
LOCATION	2330 Justin Rd, Suite 300, Highland Village, TX 75077
PHONE	(972) 317-0551
WEBSITE	cafesmilestudio.com
RATING	5.0 / 5.0 256 Google reviews, rated 5.0

■ WHERE YOU STAND TODAY

Cafe Smile Studio has already won the part most practices never get right. A 5.0 rating from 256 Google reviews is a reputation, and it was earned in the chair rather than bought. The website is the piece that has not kept up with it, and not in the way we usually find. Somebody wrote the title properly, wrote a real meta description, and put valid Dentist schema on the page, which is more care than most sites we audit have ever received. What that writing sits inside is a page fixed at 1440 pixels wide, so a phone renders it as though it were a desktop monitor and then shrinks it. There are 12 competing top-level headlines, 86 images with no alt text between them, and 0 ways to tap the phone number. On all three searches we ran, cafesmilestudio.com did not appear in the top ten. The reputation is real and the writing is real. The frame around them is what is costing you.

03 Google Business Profile Audit

Your Google Business Profile is carrying this business. Somebody in Highland Village who finds you at all is almost certainly finding you there rather than through the website. That position is worth protecting. The number beside each check is what it contributes to the 94 on page two, and there are only three of them, for a reason we explain below.

ELEMENT	GRADE	SCORE	ASSESSMENT
Rating	A	 98	5.0 on the live profile. There is no higher grade available, and your patients gave it to you rather than us.
Review volume	A	 94	256 reviews on a single profile. That is a substantial number for one practice, and it is the reason the profile outperforms everything else you own.

ELEMENT	GRADE	SCORE	ASSESSMENT
Website link	A-	90	The profile links through to cafesmilestudio.com, so the attention Google sends has somewhere to land. What happens after that click is sections 03 through 06.

Detailed findings

What we could not see, and are not going to guess at

Three things normally graded on this page were not visible to us from outside: the business description, the services and products section, and whether the profile carries current posts and photos. We did not sign in to your account, and we are not going to tell you those are empty when we have not looked. They appear on the free checklist in section 01 as places to check, not as findings. If any of them is blank, filling it costs nothing and takes an evening. If they are already full, ignore that item and we will have wasted a line of your time rather than a page of your money.

The profile is doing more work than the website is

A patient searching for a dentist in Highland Village who lands on your profile sees 5.0, sees 256 reviews, and taps through to a page built for a desktop monitor with no button to call you from. Everything the profile earned gets handed to a page that cannot finish the job. That handover, not your reputation, is the gap in this business.

How you compare locally On rating you are at the top of your market, and that is not a close call. The gap is not reputation, it is retrieval. On the search for a dentist in Highland Village, Highland Village Dental, Village Parkway Dental, Campbell and Williams Family Dental, Highland Village Smile Studio and Dental Depot DFW all came back, and cafesmilestudio.com did not. One of those names is close enough to yours to be worth saying out loud: Highland Village Smile Studio is a different practice at a different domain, and it ranks on all three searches we ran. Anyone comparing the two of you on Google today is comparing your profile against their website.

04 Website & SEO Audit

■ TECHNICAL & FOUNDATIONS

This is the plumbing a search engine needs before it can understand the site at all. Half of it here is genuinely well done, which is not the sentence we usually get to write. The other half undoes it. These six checks and the five in the next block are what average out to the 57 on page two.

ELEMENT	GRADE	SCORE	ASSESSMENT
Page title	A ⁻	 90	51 characters, naming both the practice and Highland Village. This is written the way a title should be written.
Meta description	A ⁻	 90	158 characters. That is the grey line of text under your link in search results, and yours reads like somebody wrote it on purpose rather than letting Google improvise.
Heading structure	F	 25	The homepage carries 12 h1 tags. The h1 is meant to be the one main headline Google reads first. With 12 of them, the page never says what it is about.
Structured data (schema)	A ⁻	 92	Schema is a block of hidden code that spells out your address, hours and location for search engines. You have valid Dentist schema carrying a postal address, coordinates and an opening-hours block. Most sites we audit have none of any kind.
Sitemap & indexing	B ⁻	 82	A sitemap sits at the standard address, robots.txt permits crawling, and the homepage answers cleanly over HTTPS. Nothing is blocking Google from reading the site.
Mobile viewport	F	 15	The viewport tag is fixed at 1440 pixels rather than set to the width of the device. That instructs a phone to lay the page out as though it were a desktop monitor and then shrink the result to fit.

Detailed findings

Good writing inside a frame that does not fit a phone

The title, the description and the schema on this site were done by somebody who knew what they were doing. We want to say that plainly, because the rest of this report is going to read as criticism and it should not read as criticism of that work. The problem is the container. A viewport fixed at 1440 pixels tells every phone that the page is a desktop page. The phone obeys, renders it wide, and scales it down. Text goes small, tap targets go small, and the patient who found you through a 5.0 rating starts pinching and dragging. Nothing in the writing can rescue that, because the phone has already made its decision before it reads a word.

Twelve main headlines is the same as none

Google reads the h1 to work out what a page is about, and it is built to find one. When a page has 12, the signal flattens: nothing is the headline because everything is. This is usually a side effect of a page builder that treats every section title as a headline rather than a deliberate choice, which means it is also an easy thing to unwind. Pick the one sentence you would want a stranger to read first, leave it as the h1, and step the other 11 down a level.

■ ON-PAGE & CONTENT

Google ranks pages, and the site is essentially one page doing all of the work. What is on it is decent. There is just not enough of it, and none of it is aimed at the city you practice in.

ELEMENT	GRADE	SCORE	ASSESSMENT
Image alt text	F	 12	86 images on the homepage, and 0 of them carry alt text. A search engine cannot tell a photograph of your operator from a background texture.
Content depth	D ⁺	 68	There is real written content on the page, more than a brochure site usually carries. It is spread thin across a layout that is mostly imagery, so there is less for Google to hold on to than the page appears to have.
Location content	F	 10	There is no page about Highland Village anywhere on the site. The city appears in the title and then effectively nowhere else.
Freshness	D ⁻	 60	The Internet Archive holds 3 snapshots of this domain and records the homepage content as last changing on 17 September 2025. That is not stale. It is also not a site anybody is tending.
Services on the page	B ⁻	 80	Smile makeovers, veneers, implants, Invisalign and Botox are all named. What none of them has is a page of its own, so there is nothing for somebody searching one of those terms to land on.

Detailed findings

Every service you sell is a search somebody is running right now

Veneers, implants, Invisalign and Botox all appear on your homepage as names in a list. Each of them is also a thing people type into Google with a city attached. A homepage cannot rank for five different services in a specific city, because it is one page trying to be about five things at once, and Google will hand the result to a practice that wrote a page about one. This is the single largest piece of unbuilt ground in the report, and it is unbuilt rather than broken.

The alt text problem is bigger than the alt text

86 images with 0 alt text between them is a straightforward miss on its own. The reason it matters more here is that this site leans hard on photography. A page whose content is mostly pictures, and whose pictures carry no written description, is a page a search engine can barely read. Section 01 tells you which ones to bother with.

■ LOCAL SEO & RANKINGS

This is the clearest picture in the report and the least comfortable one. Every search below was run by hand on 4 August 2026, and cafesmilestudio.com did not appear in the top ten of any of them. These five checks average out to the 36 on page two.

ELEMENT	GRADE	SCORE	ASSESSMENT
Organic rankings	F	 10	Absent from the top ten on all three searches we ran. The organic results are the plain links below the map, and your site is not among them.

ELEMENT	GRADE	SCORE	ASSESSMENT
Location pages	F	10	None. One city, and no page written about it.
Name and address consistency	B-	80	The practice name and the Justin Road address agree between your site and your Google profile. That sounds small and it is not: mismatches here are one of the commonest reasons a listing underperforms.
Directory competition	F	35	On the first search, your practice name appears on page one only inside Yelp's THE BEST 10 Dentists listicle. That is Yelp's page ranking on your name, sending the click somewhere you do not control.
Competitor field	F	45	9 competing results came back on each search, and at least one of them was a Facebook page. When a Facebook page can outrank real websites for a term, the term is winnable.

Checked by hand, 4 August 2026

SEARCH	CAFESMILESTUDIO.COM	WHAT CAME BACK INSTEAD
dentist highland village tx	Absent	Highland Village Dental, Village Parkway Dental, Campbell and Williams Family Dental, Highland Village Smile Studio, Dental Depot DFW
cosmetic dentist highland village tx	Absent	9 competing practices, one of them a Facebook page
teeth whitening highland village tx	Absent	9 competing practices, including a competitor's Facebook page

Detailed findings

Read the middle column before anything else on this page

That column has one word in it, three times. It is not a ranking we are unhappy with, it is an absence. A practice with a 5.0 from 256 reviews is invisible on the plain search results for its own city and its own services, which means every patient it wins from Google today arrives through the profile and none of them arrive through the site. The upside of that is worth naming: there is nothing to recover here, only ground to take. Sites that have never ranked have not been penalized, they have simply never been given anything to rank.

A Facebook page is outranking real websites for teeth whitening

On two of the three searches, a competitor's Facebook page came back in the results. A Facebook page has no service pages, no schema worth the name and no control over how it appears. When one of those is beating the field, the field is thin, and a real page written about teeth whitening in Highland Village would not have to be extraordinary to beat it. It would only have to exist.

■ TURNING VISITORS INTO CUSTOMERS

Being found only counts if the visitor can then do something, whether that is call, check where you are, or work out whether you are open. This is where the fixed-width page stops being a technical note and starts costing appointments. These four checks average out to the 53 on page two.

ELEMENT	GRADE	SCORE	ASSESSMENT
Click-to-call	F	 10	0 tel: links on the homepage. The number is printed as plain text, so on a phone it is something to read rather than something to press.
Page weight on a phone	F	 35	The homepage is 486,719 bytes of HTML before a single photograph has loaded. On a phone on a weak signal, that is a wait, and a wait is where people go back to the results.
Contact route	B ⁻	 80	There is a working contact page and it answers cleanly. Somebody who goes looking for a way to reach you will find one.
Address and hours available to a search engine	B ⁺	 88	Your schema publishes a postal address and an opening-hours block, so Google can read both without a person having to hunt for them on the page. This is done properly.

Detailed findings

The most expensive thing on this site is the one that takes the least work to fix

A patient reads 256 reviews at 5.0, decides you are the one, taps through, and cannot call you. The number is there. It is just not a button. On a page already rendering at desktop width on a phone screen, they now have to zoom in, read it, remember it, leave the site and dial it, and the practice they were comparing you against is one back-tap away with a call button under their thumb. Everything else in this report is a project. This is an afternoon, and it is item one in section 01 for that reason.

The page is heavy in the exact place it can least afford to be

486,719 bytes of markup is a lot of page, and it arrives before any of the 86 images do. On a desktop that is invisible. On a phone in a car park, deciding between you and the practice below you in the results, it is the difference between a page that appears and a page that is still appearing. The fixed 1440 pixel viewport and the page weight are the same problem wearing two hats: the site was built to be looked at on a monitor, and almost nobody is looking at it on a monitor.

05 Your Growth Plan

Cafe Smile Studio has already done the part nobody can do for you. A 5.0 rating from 256 Google reviews is a reputation, earned in the chair. What follows is not a rescue job. The writing on your site is better than most of what we replace, and we say so twice in the audit because it deserves saying. The frame around that writing is the problem. It is built at a fixed width for a monitor, there is no way to tap your phone number, and on all three searches we ran, your domain was absent. Everything below comes straight out of the audit you just read, in the order we would fix it. Two of the six are free in full and already on your section 01 list. We say so where that applies.

Six fixes, in the order we would do them. Each one is a finding from your audit, what it costs you while it sits there, and what we would do about it.

1 The page is built at a fixed width for a desktop monitor

The viewport is set to 1440 pixels instead of the width of the device, so a phone lays the page out as though it were a monitor and then shrinks the whole thing to fit. Text goes small, buttons go small, and the patient who came to you off a 5.0 rating starts pinching and dragging. On top of that, the homepage is 486,719 bytes of markup before any photograph loads. Nothing you write can outrun a layout decision the phone has already made.

OUR FIX A new site that lays out for the screen it is on, keeps the title, the description and the schema that are already right, and carries far less weight to the phone.

THE RESULT The page a patient lands on looks like it was built for the device in their hand, because it was.

2 There are 0 tappable phone numbers on the site

The number is printed. It is just not a link, so on a phone it is something to read rather than something to press. A patient who has decided on you has to zoom in, remember the digits, leave the site and dial. The practice below you in the results is one back-tap away with a call button under their thumb.

OUR FIX This one is on your free list in section 01 and you should just do it, today, whether or not you ever hire us. It is a two-minute change for whoever maintains the site. We would carry it into the new build as a permanent fixture rather than a fix.

THE RESULT The gap between deciding to call and calling is one thumb.

3 There is no page about Highland Village and no page about any service you sell

On all three searches we ran, cafesmilestudio.com was absent from the top ten. Veneers, implants, Invisalign and Botox are named on your homepage as items in a list, and each of them is also a phrase somebody types with a city attached. A homepage cannot rank for five things at once, so the result goes to a practice that wrote a page about one. On the first search, the only place your name appears on page one is inside Yelp's listicle, which is Yelp's page collecting the click.

OUR FIX A page for Highland Village and a page for each service worth ranking for, written properly, linked together, and pointed at from your Google profile. This is the largest single piece of work in the plan and it is unbuilt ground rather than damage.

THE RESULT The plain results start sending you patients instead of sending them to a directory.

4 12 competing top-level headlines and 86 images with no alt text between them

Google reads the main headline to work out what a page is about, and it is built to find one. With 12 of them, none of them counts. Meanwhile the site leans hard on photography, and a page made mostly of pictures that carry no written description is a page a search engine can barely read.

OUR FIX This whole item is free and it is items two and three of your section 01 list. Do it yourself and keep the money. Pick one headline, step the rest down a level, and write alt text on the photographs of the practice, the team and your own work. Leave the decorative ones alone. If we build the new site, this comes with it either way.

THE RESULT The page finally tells Google what it is about, in one sentence, on purpose.

5 256 reviews at 5.0, and nothing systematic keeping that going

Nothing yet, which is the point. A review pace is only visible in hindsight, and the practices that lose it lose it quietly, because asking is the first thing that falls off a busy front desk. Your reviews are also unquoted on your own homepage, so the strongest sales material you own is sitting on Google doing nothing for the site.

OUR FIX A request that goes out automatically after the appointment rather than depending on somebody remembering, replies written and posted on the ones that come in, and three of your reviews quoted on the homepage with the patient's first name. That last part is free and it is item four in section 01.

THE RESULT The number that already sells this practice keeps climbing without anybody having to remember to ask.

6 256 reviews from patients who liked you enough to write about it, and no visible way to reach any of them again

We want to flag this one clearly: it is an inference, not a finding. We cannot see your patient records from outside and we are not going to pretend otherwise. What we can see is a practice with a 5.0 from 256 reviews and no sign of a list, a newsletter or a recall campaign anywhere on the public side. If that is wrong, tell us at the sit-down and we will take this off the plan.

OUR FIX Every patient in one place, recall and reactivation campaigns that go out on a schedule, and lead follow-up that happens in minutes rather than whenever somebody gets to the inbox.

THE RESULT The people who already trust you hear from you again without you having to think about it.

06 Who We Are & What It Costs

■ WHO IS SENDING YOU THIS

Top Shelf Solutions builds and runs the online side of small businesses in North Texas. Websites and local SEO are where most people meet us, but the work usually ends up broader than that, because the website is rarely the only gap. We do all of the following, and a practice your size normally uses four or five of them rather than all ten. Two of the businesses running on this are Your Neighborhood GDR and TAP Services. Both of those are ours, which is the reason we can show you the whole thing working instead of handing you a testimonial. If you want to talk to either of them, ask at the sit-down and we will put you in touch.

Websites & SEO	AI Phone & Chat	CRM & Follow-Up
Reviews & Reputation	Marketing & Social	Online Booking

Payments & Financing	AI & Automation	Memberships & Loyalty
POS & Inventory		

■ THE ONE WE WOULD PUT YOU ON

Signature Blend

MOST POPULAR

\$899

Per month, everything below included. There is no setup fee and no build fee, and the new website is part of the plan rather than a line item on top of it. Telecom usage, meaning phone numbers and SMS, is billed at what it costs us. The term is six months to start and then month to month after that, with 30 days notice to cancel. Your website, your domain, your Google profile, your phone numbers, your review profiles and your patient list are in your name from the first day and you keep all of it if you ever leave. The CRM platform itself stays ours, the same as any software you subscribe to, and your data exports whenever you want it.

■ WHAT COMES WITH IT

- A new custom website, built and hosted
- Your Google Business Profile optimized
- Advanced SEO, worked every month
- AI Receptionist, answering around the clock and booking the appointment
- Missed-call text-back on your main line
- Review requests sent automatically
- Review responses written and posted for you
- The Top Shelf CRM, every patient in one place
- Patient reactivation campaigns
- Lead follow-up in under five minutes
- Lead-capture forms, and booking if you use it
- A plain-English dashboard every month

■ WHY THIS ONE, FOR CAFE SMILE STUDIO SPECIFICALLY

The new website

Here is the part most agencies would not tell you: we would not throw away the writing on your site. The title, the meta description and the Dentist schema are better than most of what we replace, and they are staying. What has to change is the frame they sit in, which is fixed at 1440 pixels and weighs 486,719 bytes. Work starts the day you sign and the site is live within a week of us getting photos and access. One thing to say plainly rather than let you find later: the plan covers a five-page site, and your growth plan runs past that, because a home page, a contact page, a Highland Village page and a page for each service you want to rank for adds up. We would sort that out with you at the sit-down.

Your Google profile

The profile is carrying this business and it is the strongest thing you own. A 5.0 from 256 reviews with the site linked is not something we improve so much as protect and finish. Section 01 shows you how to check the parts we could not see from outside, and most of that is free.

Advanced SEO

You were absent from the top ten on all three searches we ran, and on one of them a directory ranks on your own name. There is nothing to recover here, which is the good news. A site that has never ranked has not been penalized, it has simply never been given anything to rank. Most of this work is writing the pages that do not exist yet and getting Google to trust them.

AI Receptionist	We could not test this from outside, so treat it as a question rather than a finding. A practice cannot answer the phone with a patient in the chair, and calls after five o'clock go somewhere. The receptionist is software, not a person, and it answers every time, books into your calendar, and texts back anything it cannot handle so a real answer follows in the morning.
Reviews, both ways	A 5.0 across 256 reviews says the asking already works whenever it happens. What it does not say is that it happens every time, because it never does at a busy front desk. The system asks for you, and replies to what comes in, which is the half almost nobody does.
CRM and reactivation	This one is an inference, not a finding, and we would rather label it than dress it up. 256 reviews came from patients who cared enough to write one. If you already keep a list and run recall properly, say so and we will take this off the plan and off the price conversation.

This is the plan most businesses start on, and it is the one we would put you on, because all six of the fixes in your growth plan live inside it. There is a smaller plan below it at \$499. It builds you the same website at no charge, so the site is not the reason to skip it. What it leaves out is everything that keeps working after the site goes live: SEO worked every month, review responses written and posted for you, the patient database and the recall campaigns that reach people you currently have no way to reach, a receptionist covering the hours a practice does not, and lead follow-up in under five minutes. There is a larger plan above it at \$1,599. What it mainly adds is paid advertising, and we would rather you did not buy that yet. Paid traffic lands on the same page the free traffic lands on, and right now that page cannot take a call. Fix the page and earn the plain results first. If you still want ads after that, step up then and we will have made the case for it with your own numbers instead of a promise. One more thing owners ask, so we will answer it before you have to. The website is built in the first week, not the ninth month, as soon as we have photos and access from you. What the monthly pays for after that is the part that never gets done twice: the phone answered after hours, reviews asked for and answered, past patients contacted again. The audit in your hands and the sample site we built you are what we do before anybody pays us anything. If the sit-down turns up something different, we will tell you that instead.

■ THE BIGGER PICTURE

This is only the part we can see from the outside.

Everything in this document came from what is publicly visible: your listing, your site, your rankings. The things we cannot audit from a laptop are usually where the bigger wins are. Calls that come in while a chair is occupied. Patients who meant to book the follow-up and did not. Two hundred and fifty-six reviews from people whose phone numbers we have no way of knowing you have. Give us 20 minutes, at the practice or on the phone, and we will go through those with you and tell you which ones are worth doing and which are not. The audit is free and yours to use however you want, with us or without us.

Let's set up your sit-down.
