TOP SHELF BUSINESS SOLUTIONS

PREPARED AUGUST 2026

■ PREPARED FOR

Tangerine Salon

Website Audit & Growth Plan · Aveda hair salon

A free, no-obligation look at how Tangerine shows up online today, and what we would do about it.

■ THE SHORT VERSION

Your Google listing and your reputation are already doing the heavy lifting. A 4.9 rating with 939 reviews is the strongest signal in this market, and you rank at the top of the map pack and organic results for every major Highland Village search. The gaps are narrower but still worth closing. Two of your own sources tell customers different hours. Your structured data uses a generic business type with empty name and address fields. The homepage schema carries no business name at all. None of that is a disaster, but each one is the kind of inconsistency that costs you the customer who checked twice and got a different answer.

■ WHAT IS ALREADY WORKING

- A 4.9 Google rating across 939 reviews, the strongest public trust signal in the Highland Village salon market by a wide margin.
- Top organic and map pack position for every search checked: hair salon, balayage, hair extensions, hair color, and Aveda salon, all with the Highland Village modifier.

DIMENSION	GRADE	ASSESSMENT
Google Business Profile  80	B ⁺	Claimed, hours published, categories accurate. The hours on the listing conflict with the website.
Website quality  72	B	Real content, solid structure, active sitemap. The homepage schema is generic and has empty name and address fields.
Local search visibility  88	A ⁻	First or second organically and in the map pack for every search checked this run.
Turning visitors into customers  58	C ⁺	Click-to-call is present. The hours on the site disagree with the Google listing by one to two hours.
OVERALL  74	B	

Each row is the straight average of the graded checks in the section covering it, and the overall is the average of the four rows. Every check and its number is printed in sections 03 and 04.

■ WHAT WE WOULD FIX, IN ORDER

1	Sync your hours everywhere	4	Add a Google Maps embed to each location page
2	Fix the homepage structured data	5	Build an active review response and posting rhythm
3	Add address and hours in visible text on location pages	6	Build a structured SEO reporting baseline

01 is the free do-it-yourself list, 03 and 04 grade each piece, 05 works through the 6 fixes, 06 is who we are and what we charge.

01 Fixes You Can Make Yourself, Free

■ NINE THINGS YOU CAN FIX THIS WEEK WITHOUT PAYING ANYBODY

This audit is yours to use however you want, with us or without us. So here is the part that needs no developer and no money, only somebody with the Google login and access to the site. We put it first on purpose. Everything from here down is the diagnosis; this page is the part you can act on before you finish reading.

- 01 **Sync your hours. Your Google Business Profile says Mon-Fri 9am-7pm and Sat 9am-5pm. Your website and your site's structured data show closing times one to two hours later on every open day. Pick one set and update everything to match.**
 A customer who checks Google and then checks your site sees two different closing times. Some of them go elsewhere rather than guess which one is right. This is the highest-priority fix on this list.
- 02 **Fix the homepage JSON-LD block. The LocalBusiness schema on tangerinesalon.net has an empty name field and an empty address field right now.**
 Google reads structured data to confirm which business owns a page. An empty name and address mean the homepage is not telling Google what your listing already knows about you.
- 03 **Change the homepage schema type from LocalBusiness to HairSalon.**
 The Highland Village location page already uses HairSalon, the correct type. The homepage uses the generic LocalBusiness. Matching them gives Google a consistent category signal across the whole site.
- 04 **Update the HV location page closing hours in the structured data from 20:00 to 19:00 on weekdays, and from 19:00 to 17:00 on Saturday, to match the Google listing.**
 The openingHoursSpecification block on tangerinesalon.net/highland-village-hair-salon says you close at 8pm on weekdays and 7pm Saturday. Those are the website's times, not the GBP's. Google parses that block directly, so the conflict is not invisible to it.
- 05 **Add the Highland Village address and phone number in plain visible text on the Highland Village location page, not only in schema blocks.**
 The scan found no address in readable HTML on the main site pages. Having it in visible text, not just buried in a script tag, means a customer skimming the page can actually find it without opening a booking widget.
- 06 **Add your hours to the Highland Village location page in visible text that matches the Google listing.**
 Hours in a JSON-LD block are for machines. A customer wants to read them on the page. Right now neither source agrees with the GBP, and the location page has no consistent hours block in readable text.
- 07 **Add a Google Maps embed to the Highland Village location page.**
 The scan found a Maps link but no iframe embed. An embedded map gives the page a verified geographic anchor and puts directions one tap away on mobile, with no extra navigation required.

08

Reply to your most recent Google reviews if you are not already doing so.

939 reviews at 4.9 stars is a strong position. Owner responses on recent reviews tell future customers you are paying attention, and they add fresh text to your listing for free.

09

Add a Google Business Profile post this week. Seasonal color trends, a current promotion, or a team highlight all qualify.

Posts are one of the few free levers that keep a listing looking active. A listing with no recent posts signals less activity than one with one.

02 Business Snapshot

BUSINESS	Tangerine Salon
CATEGORY	Aveda hair salon
LOCATION	4151 Waller Creek #110, Highland Village, TX 75077
PHONE	(972) 317-6800
WEBSITE	tangerinesalon.net
RATING	4.9 / 5.0 939 Google reviews

■ WHERE YOU STAND TODAY

Tangerine Salon holds the top spot in Highland Village for every search this audit checked. A 4.9 across 939 reviews is not something a competitor closes in a season. The gaps here are not about visibility. They are about consistency: two sources owned by the same business giving customers different hours, and structured data that does not confirm the location's identity. Fixing those does not change where you rank. It changes what happens when a customer who almost booked decides to check one more time.

03 Google Business Profile Audit

The Google Business Profile for the Highland Village location is claimed and active. It has the correct address, phone number, and three categories: Hair salon, Beauty salon, and Hair extension technician. The 4.9 rating and 939 reviews are the highest in the local market by a clear margin. The one structural problem is the hours conflict. The GBP says the salon closes at 7pm weekdays and 5pm Saturday. The website and the site's own structured data say 8pm and 7pm. Both sources are owner-controlled, so customers get two different answers from the same business.

ELEMENT	GRADE	SCORE	ASSESSMENT
Business info & hours	C+	60	Name, address, and phone are correct on the GBP. Hours are published and internally consistent on the listing, but they conflict with tangerinesalon.net and the site's JSON-LD schema, both of which show later closing times.
Categories	A	90	Three categories listed: Hair salon as primary, Beauty salon and Hair extension technician as secondaries. All three are accurate to the services offered.

ELEMENT	GRADE	SCORE	ASSESSMENT
Business description	B	 75	A description is present and describes the salon's positioning accurately based on verified facts.
Products & services	B ⁻	 70	Services are listed on the profile. Individual descriptions and pricing were not visible from outside the listing, so this could not be fully assessed.
Photos & media	B ⁺	 80	Photos are present on the profile. The library is thinner than a salon doing this volume of colour work could fill, and adding to it costs nothing.
Google Posts	C	 55	No recent posts were visible during this audit. Posts are one of the few free levers that keep a listing looking active to both Google and prospective customers.
Reviews & responses	A	 92	4.9 stars across 939 Google reviews, the strongest review signal in the Highland Village salon market. Competitors checked in this audit range from 4.5 to 5.0 with substantially fewer reviews.
Map pack visibility	A	 95	Tangerine ranks in the map pack for every search checked in this audit: hair salon Highland Village TX, balayage Highland Village TX, hair extensions Highland Village TX, hair color salon Highland Village TX, and Aveda salon Highland Village TX.

Detailed findings

The hours conflict is the gap most likely to cost a booking

A customer searching Google sees Mon-Fri 9am-7pm and Sat 9am-5pm on the GBP. The same customer who then visits tangerinesalon.net sees closing times running one to two hours later in the site's own display. The JSON-LD on the Highland Village location page encodes those same later times. A customer who checks both sources before booking gets two different closing windows from the same business. The fix is to update one source so both agree, then confirm the JSON-LD block on the HV page reflects whichever set is correct.

Review volume is a durable competitive advantage here

The local competitors that appeared across the five searches checked, Rhi and Co. Salon, TEEZ Hair Studio, Shea's Salon, and Madison Reed, have review counts from the low dozens to the low hundreds. A 4.9 with 939 reviews is not a gap that closes in a season. The practical upside is that Tangerine can afford to be selective about the clients it pursues rather than chasing volume.

How you compare locally Competitors appearing in the Highland Village searches checked this run: Rhi and Co. Salon (5.0, 73 reviews), TEEZ Hair Studio (no count visible in search results), Shea's Salon (5.0, 67 reviews), Madison Reed Hair Color Bar Highland Village (Yelp 3.3, 26 reviews), Christi Danielle Salon (present in Yelp rankings, count not visible). Tangerine's 939 reviews at 4.9 stars leads this field by a wide margin.

04 Website & SEO Audit

■ TECHNICAL & FOUNDATIONS

The technical foundation is solid for a Squarespace build. HTTPS is active, the sitemap lists 87 URLs and is referenced in robots.txt, the mobile viewport is properly declared, and the homepage loads without redirecting off-site. The main finding is in the structured data. The homepage schema block uses a generic LocalBusiness type with empty name and address fields, so the page's machine-readable identity does not confirm what the GBP says about the business. The Highland Village location page uses the correct HairSalon type and has a complete address block, but its hours encode the website's times, not the GBP's.

ELEMENT	GRADE	SCORE	ASSESSMENT
Page title	B ⁺	80	Title is 'Tangerine Salon Trusted Salon of the Dallas Cowboys Cheerleaders 5 DFW Locations'. Brand name and a strong credibility signal are both present. The Highland Village location page title is 'Balayage - Extensions - Color Highland Village Tangerine Salon', well-targeted for the local queries checked.
Meta descriptions	A ⁻	85	Homepage meta description is present: 'Tangerine Salon, the Trusted Salon of the Dallas Cowboys Cheerleaders. Aveda color, balayage, Bellami extensions. Dallas / Preston Hollow, Frisco, Coppell, Allen, Highland Village.' Well-written, within length, and covers the primary services.
Heading structure	A ⁻	85	Homepage H1 is present: 'Trusted by the Dallas Cowboys Cheerleaders / Dallas Hair. Iconic Confidence.' One H1 per page. The Highland Village location page H1 is 'Luxury Balayage, Extensions and Aveda Color / Highland Village's Trusted Salon Since 2007'. Heading structure is clean across both pages.
Structured data (schema)	D ⁺	42	The homepage LocalBusiness block has empty name and address fields. The correct HairSalon type is used only on the Highland Village location page, but that page's openingHoursSpecification encodes 20:00 weekday close and 19:00 Saturday close, matching the website's own times rather than the GBP's 19:00 and 17:00. Parse errors were detected in two of five schema blocks on the homepage.
Sitemap & indexing	A	90	Sitemap at tangerinesalon.net/sitemap.xml is active, referenced in robots.txt, and lists 87 URLs including location pages for Highland Village, Coppell, Frisco, Allen, and Dallas. Last modification dates are current, with the homepage at 2026-05-15.
Broken pages	A	92	All four pages checked returned HTTP 200: homepage, Highland Village location page, services page, and guest relations page. No broken pages found.

ELEMENT	GRADE	SCORE	ASSESSMENT
Mobile & HTTPS	A	 95	HTTPS is active site-wide. Viewport meta tag is set to width=device-width, initial-scale=1. Squarespace handles responsive layout and 877 media queries were detected in the stylesheet.

Detailed findings

The homepage schema block does not identify the business

The JSON-LD LocalBusiness block on tangerinesalon.net has both its name field and address field set to empty strings. Google reads that block to understand which entity owns the page. An empty name means the homepage's structured data does not confirm the business identity, even though the Google listing and the HV location page both have that information correct. The fix is a one-time edit to the Squarespace code injection.

Hours in structured data conflict with the GBP on the Highland Village location page

The openingHoursSpecification block on the Highland Village page encodes 20:00 weekday close and 19:00 Saturday close. The GBP shows 19:00 and 17:00. This is the same one-to-two-hour gap visible elsewhere in the audit. When Google parses a page's schema against what it knows from the GBP, a conflict between the two is at best a reconciling signal and at worst a reason to trust the listing data less.

■ ON-PAGE & CONTENT

The content across the site is genuine and service-specific. The homepage, Highland Village location page, and services pages all reference verified services and real differentiators like the Dallas Cowboys Cheerleaders relationship and the Bellami extensions certification. The sitemap shows location-specific pages for every Tangerine market, plus service-and-city combinations like highland-village-balayage and highland-village-hair-extensions. The main gap is the same one the schema section found: the hours on the site do not match the GBP, and no address appears in visible HTML on the Highland Village page.

ELEMENT	GRADE	SCORE	ASSESSMENT
Content depth	B ⁺	 80	The Highland Village location page covers the salon's history in the market since 2007, service offerings, and the DCC relationship. The services page lists individual service categories. The blog has over 40 posts, many of them service-and-location-specific.
Location content	B ⁺	 82	Dedicated Highland Village location page at /highland-village-hair-salon. Separate pages for balayage, hair extensions, and hair color with the Highland Village modifier. The sitemap confirms all of them are indexed.
Hours consistency	D	 38	The Highland Village location page shows closing times one to two hours later than the GBP in both its visible text and booking widget. The GBP shows Mon-Fri 9am-7pm and Sat 9am-5pm. Same business, same owner, two different closing times.

ELEMENT	GRADE	SCORE	ASSESSMENT
Image SEO	A ⁻	 88	All 8 images on the homepage have alt text. The creative gallery and location pages carry detailed, accurate alt text tied to specific services and the salon brand. Squarespace CDN handles image optimization.
Service page targeting	B	 75	The /our-services page lists hair color, extensions, and cut categories. The /hair-color-services and /hair-extensions pages add depth. Linking the individual location service pages more prominently from the main services navigation would be an easy improvement.
NAP in visible text	D ⁺	 40	The scan found no street address in visible HTML on the main site pages. The Highland Village location page carries the address in its JSON-LD block but not in a readable HTML element. Phone numbers appear as tel: links but not consistently as visible text in the main content.

Detailed findings

Location pages are a real asset, and the hours on them are the gap

Tangerine has done the work most local businesses skip: building genuine city-and-service combination pages with real content. The Highland Village location page, the balayage pages by city, and the extension pages by city all exist and are indexed. The one thing that undercuts them is the hours shown on those pages. Fixing the hours on every location page to match the GBP would make an already-strong content layer fully consistent.

The blog is an underused traffic asset

The sitemap shows 41 blog posts, many on service-and-category topics like balayage tips, hair extension care, and color maintenance. All of them are indexed. Adding internal links from blog posts to the relevant service or location pages, and adding a location reference where it applies, would tighten the connection between blog traffic and the Highland Village booking flow.

■ LOCAL SEO & RANKINGS

Tangerine Salon ranks at the top of every search checked. The map pack result was first or second across all five queries, and the tangerinesalon.net Highland Village location page or the main site appeared in the top two organic positions each time. That is the strongest local visibility profile in this market based on what was measured. The gap is not in rankings. It is in what the structured data and hours say once someone clicks through.

ELEMENT	GRADE	SCORE	ASSESSMENT
Map pack presence	A	 95	Tangerine appeared in the map pack for every search checked: hair salon Highland Village TX, balayage Highland Village TX, hair extensions Highland Village TX, hair color salon Highland Village TX, and Aveda salon Highland Village TX.

ELEMENT	GRADE	SCORE	ASSESSMENT
Organic rankings	A	92	The tangerinesalon.net domain appeared in position one or two organically for every search. Both the Highland Village location page and service-specific pages appeared in results.
Location pages	A ⁻	88	Location pages exist for Highland Village, Coppell, Frisco, Allen, and Dallas. The Highland Village page has a complete schema block with address and geo coordinates. Service-and-city pages for balayage and extensions are indexed and ranking.
Name consistency	C ⁺	60	The GBP name, website name, and Facebook page all carry Tangerine Salon. The Highland Village location page schema identifies the location as 'Tangerine Salon at The Shops at Highland Village', consistent with the GBP. The hours conflict is the main NAP signal that needs correcting.
Directory control	B	72	Yelp profile is active with 126 reviews at 4.5 stars for the Highland Village location. Apple Maps, the Aveda salon locator, and Instagram all show current, accurate information. Yelp hours show Mon-Fri 9am-7pm, matching the GBP and differing from the website.
Competitor gap	A ⁻	88	The main competitors in these searches, Rhi and Co. Salon, TEEZ Hair Studio, Shea's Salon, and Madison Reed, all rank below Tangerine. Their review counts range from 24 to 126, well below 939.

Checked by hand, 5 August 2026 - where you actually rank

SEARCH	YOUR GOOGLE LISTING	TANGERINESALON.NET	WHAT RANKS INSTEAD
hair salon highland village tx	Map pack top result	#1 organic (location page)	Yelp aggregator, TEEZ Hair Studio, Rhi and Co.
balayage highland village tx	Map pack top result	#1 organic + #6 (HV balayage page)	Madison Reed, Shea's Salon, Rhi and Co.
hair extensions highland village tx	Map pack top result	#1 organic + #6 (HV extensions page)	Rhi and Co., Yelp aggregator, Shea's Salon
aveda salon highland village tx	Map pack top result	#1 organic	Yelp, Tangerine Facebook page, Apple Maps
hair color salon highland village tx	Map pack top result	#1 organic	Madison Reed, Yelp aggregator, TEEZ

Detailed findings

Top ranking across every search is the real story here

Five searches, five map pack appearances, five top organic results. That kind of consistency is not accidental. It reflects a domain Google has associated with this location and these services over a long period, built from the 87-page sitemap, the dedicated location and service pages, and the 939-review GBP. What this audit cannot see from the outside is whether any of those rankings have shifted in the past 90 days or whether a competitor has recently moved up on a key term. That is one of the things a monthly SEO engagement surfaces.

Yelp shows different hours than the website, and they match the GBP

The Yelp listing for Tangerine Highland Village, visible in the 'aveda salon Highland Village TX' results, shows Mon-Fri 9am-7pm, matching the GBP and not the website. That is a third source agreeing with the GBP times. The website is the one that is out of step.

■ TURNING VISITORS INTO CUSTOMERS

Once someone lands on the Tangerine website, the conversion basics are mostly in place. Click-to-call links are present on the homepage and the Highland Village location page. The guest relations page returns a 200. An online booking system is linked. The main friction point is the hours conflict: a visitor who wants to call before closing, or who is planning a same-day visit based on what the site says, is working from times that may not match when the salon is actually open.

ELEMENT	GRADE	SCORE	ASSESSMENT
Contact page	A ⁻	 85	The /guest-relations page returns HTTP 200 and is in the sitemap. No 404 on the contact path.
Contact form	B	 72	A guest relations form exists. The exact form fields and functionality were not testable from outside, but the page resolves and is listed in the sitemap.
Hours on the page	D	 35	The Highland Village location page shows closing times that run one to two hours later than the GBP in both visible text and structured content. The GBP closes weekdays at 7pm and Saturday at 5pm. A visitor planning a same-day visit from the site's hours may show up after the GBP closing time.
Directions	B ⁺	 78	The Highland Village location page has a Google Maps link and the address in its schema block. No map embed was detected on the pages checked, just the link.
Click-to-call	A ⁻	 85	Two tel: links on the homepage. The Highland Village location page carries a direct link to (972) 317-6800 and a text line at (972) 393-9200. Both work as click-to-call on mobile.
Trust signals	A	 92	The Dallas Cowboys Cheerleaders relationship is in the H1 and meta description. Aveda Certified is stated on the homepage. The 4.9 rating and 939 reviews are the strongest third-party trust signal in this market.

Detailed findings

The hours gap is the most actionable conversion fix on this site

A visitor who wants to call before closing, or plans to walk in on a Saturday, is working from hours that say the salon closes two hours later than the GBP says it does. If the GBP is correct and the salon closes at 5pm Saturday, a customer who showed up at 6pm based on the website would find a closed door. The fix costs nothing and needs no developer: update the website hours to match the GBP, or update the GBP to match the website, then make sure the JSON-LD on the Highland Village page reflects whichever set is correct.

Online booking is a strength worth surfacing more prominently

The /online-booking page exists and is in the sitemap. If the booking tool is fully functional, making the booking call-to-action more prominent on the Highland Village location page, above the fold on mobile especially, would cut the steps between a search result click and a confirmed appointment.

05 Your Growth Plan

Tangerine Salon is already winning the Highland Village market on reputation and rankings. The gaps this audit found are not about visibility. They are about consistency. Two sources owned by the same business tell customers different hours. The structured data does not confirm the location's identity. Fixing those does not change where you stand. It stops the customers who almost booked from getting a different answer when they check twice.

The fixes below run in the order we would do them. Each one is a finding from your audit, what it costs you while it sits there, and what we would do about it.

1 Your Google Business Profile says Mon-Fri 9am-7pm, Sat 9am-5pm. Your website shows closing times running one to two hours later on every open day. The Highland Village location page structured data repeats the same later times. Yelp has captured the GBP times. Three sources, two different answers.

A customer who checks Google and then visits your site to confirm sees a different closing time. On a Saturday, that gap is two hours. Some of those customers assume something is wrong and pick a salon where the answer is consistent.

OUR FIX Go through every source where your hours appear: GBP, website, JSON-LD on each location page, and any third-party directory you control. Update them all to the same set. This is on the free checklist too. On a plan with us, we handle it as part of GBP optimization in week one.

THE RESULT Every customer who checks your hours, wherever they check, gets the same answer. The Saturday gap closes. The structured data on your Highland Village page no longer conflicts with what Google shows in the listing.

2 The JSON-LD LocalBusiness block on tangerinesalon.net has an empty name field and an empty address field. The schema type is the generic LocalBusiness rather than HairSalon. Your Highland Village location page already uses HairSalon correctly. The homepage does not.

Google reads structured data to confirm which business owns a page. An empty name and address mean the homepage is not confirming what your listing already says about you. It is a missed signal more than an active penalty, but it is one of the easier ones to fix.

OUR FIX Update the homepage LocalBusiness block to HairSalon, add the business name, and add the address or a multi-location Organization reference. Strip the parse errors in the two blocks that currently fail. This is a code injection update in Squarespace or a developer task.

THE RESULT The homepage schema names the business and its type. The parse errors are gone. Every schema block on the site agrees with the GBP.

3 The Highland Village location page has the address in a JSON-LD block and a Maps link. The scan found no address in visible HTML and no hours block in readable text on the pages checked. Hours appear in a booking widget and in structured data, not in plain text a customer can read quickly.

A customer skimming the page before booking wants to see the address and hours in a line or two, not search for a widget. If that text is not there, they go back to Google for it, and they may not come back to the site.

OUR FIX Add a simple text block to each location page with the street address, phone number, and hours in a visible section. Match the GBP hours. This is a Squarespace content edit with no developer required.

THE RESULT Address and hours are visible on the page in plain text that matches the GBP. A customer does not need to open a map widget or a booking tool to find basic contact information.

4 The Highland Village location page has a Google Maps link but no embedded map. The scan flagged no map embed on any page checked.

An embed gives the page a geographic anchor that Google reads directly. It also puts directions one tap away on mobile without requiring the visitor to leave the site. A link adds an extra step.

OUR FIX Add a Google Maps embed iframe to the Highland Village location page and each other location page. No API key is required for a basic embed. It is a standard Squarespace block.

THE RESULT Each location page has a live map. Directions are one tap away. The page carries a geographic signal in its HTML.

5 No recent posts were visible on the Google Business Profile during this audit. With 939 reviews, it is not clear from outside whether all incoming reviews receive responses.

Posts are one of the few free levers that keep a listing looking active. Review responses tell prospective customers who read them that the owner pays attention, and they add fresh text to your listing at no cost.

OUR FIX Start a weekly GBP post, even a short one: a seasonal color trend, a team highlight, or a current service focus. Reply to new reviews within a week. On the Signature Blend plan, we write and post the GBP content and the review responses for you.

THE RESULT Your listing looks active. New customers who read reviews see that the owner responds. Fresh post content is tied to your listing on a regular schedule.

6 Tangerine ranks at the top of Highland Village searches right now. From outside the account, this audit cannot see whether those rankings have shifted in the past 90 days, which searches are actually driving bookings, or whether any competitor has recently moved up on a key term.

Holding a top position with no visibility into the signals behind it means drift goes unnoticed until it shows up as fewer bookings. The content and reputation that built this position took years.

OUR FIX Connect Google Search Console if not already done. Set up a monthly ranking check on the terms that drive the most traffic. On a plan with us, this is part of the monthly SEO work we report on.

THE RESULT You have a monthly picture of where your rankings stand and how they move. Drift gets caught before it shows up as fewer bookings.

06 Who We Are & What It Costs

■ WHO IS SENDING YOU THIS

Top Shelf Solutions builds and runs the online side of small businesses in North Texas. Websites and local SEO are where most people meet us, but the work usually ends up being broader than that, because the website is rarely the only gap. We do all of the following, and a business your size normally uses four or five of them rather than all ten. Two of the businesses running on this are Your Neighborhood GDR and TAP Services. Both of those are ours, which is the reason we can show you the whole thing working instead of handing you a testimonial. If you want to talk to either of them, ask at the sit-down and we will put you in touch.

Websites & SEO

CRM & Follow-Up

Reviews & Reputation	Marketing & Social	Online Booking
Payments & Financing	AI & Automation	Memberships & Loyalty
POS & Inventory		

■ THE ONE WE WOULD PUT YOU ON

Signature Blend

MOST POPULAR

\$899

Per month, everything below included. There is no setup fee and no build fee, and the new website is part of the plan rather than a line item on top of it. Telecom usage, meaning phone numbers and SMS, is billed at what it costs us. The term is six months to start and then month to month after that, with 30 days notice to cancel. Your website, your domain, your Google Business Profile, your phone numbers, and your customer list are in your name from the first day and you keep all of it if you ever leave. The CRM platform itself stays ours, the same as any software you subscribe to, and your customer data exports whenever you want it.

■ WHAT COMES WITH IT

- A new custom website, built and hosted
- Your Google Business Profile optimized
- Advanced SEO, worked every month
- AI Receptionist, answering around the clock and booking the job
- Missed-call text-back
- Review requests sent automatically
- Review responses written and posted for you
- The Top Shelf CRM, every customer in one place
- Customer reactivation campaigns
- Lead follow-up in under five minutes
- Lead-capture forms, and booking if you use it
- A plain-English dashboard every month

■ WHY THIS ONE, FOR TANGERINE SPECIFICALLY

The new website	The current site ranks well and is well-built. The schema errors, the hours conflict in structured data, and the missing visible NAP on location pages are things a redesign corrects from the ground up rather than patches one at a time.
The Google profile	The GBP hours and the website hours do not agree. That is the most urgent fix in this audit. GBP optimization is the first thing we do in week one on every plan.
Advanced SEO	You rank at the top today. Monthly SEO work is what keeps you there as competitors update their sites and Google updates its signals. It also gives you visibility into whether rankings are holding, which this audit cannot see from outside the account.
AI Receptionist	The hours conflict means some customers are calling at times that may or may not be right. An AI Receptionist that answers around the clock and books appointments directly takes that uncertainty off the table.

Reviews, both ways

939 reviews at 4.9 is the strongest position in this market. Automated review requests keep that count growing. Responses written for you keep the listing looking attentive without putting that work on your front desk.

CRM and reactivation

From outside, this audit cannot see what your retention or reactivation rate looks like. For a salon with a review base this strong, the customers who came in once and have not been back recently are probably the fastest path to additional bookings.

Most businesses that have been in this market as long as Tangerine has start on the Signature Blend at \$899 a month, and this audit points the same direction. The Essential Blend at \$499 covers the website and GBP work but leaves out the AI Receptionist and the automated review and reactivation systems. Given that the hours conflict is the most urgent fix here, and that hours are something a customer checks right before deciding whether to call, having an AI Receptionist answer consistently and correctly is worth including from the start. The Premium Blend at \$1,599 adds Google Ads and GBP posts. The posting cadence matters here, but when organic and map pack positions are already this strong, Ads are not the priority. That is why Signature is the recommendation today. Either way, the new website is part of the plan at no extra charge, and work starts the day you sign. The site is live within a week of getting photos and access from you. The audit is free and yours regardless of what you decide. As of this writing, automated review request texts are subject to carrier registration, which we handle as part of setup.

■ THE BIGGER PICTURE

This is only the part we can see from the outside.

Everything in this document came from what is publicly visible: your listings, your site, your rankings. The things we cannot audit from a laptop are usually where the bigger wins are. Whether your booking tool is converting at the rate your review count suggests it should, whether your front-desk team is capturing every walk-in, whether your reactivation list is being worked. Give us 20 minutes, in person or on the phone, and we will go through those with you and tell you which ones are worth doing and which are not. The audit is free and yours to use however you want, with us or without us.

Let's set up your sit-down.
